

Healing in a Hospital or a Hospice

A two day course

This workshop aims to provide practical skills and an understanding of what is required of Healers when delivering Healing in a health care setting

Learning outcomes: On successful completion the student will be able to:

- Identify and approach a statutory setting
- Be able to identify infection control issues and data issues
- Understand how to adapt their therapy delivery
- Have an understanding of professional boundaries
- Personal preparation of the Healer for a health care setting
- Learn to make a bridge with a common language that bridges, not alienates
- Simple Anatomy
- In depth healing practice
- Infection issues
- Healing techniques to assist medical procedures
- Understand how the Healer supports the patient's journey
- Record treatments
- Confidentiality

Delivery methods: This course is delivered by Angie Buxton-King via discussion, healing practice, role play and group work.
